

# GEFCO SERVICES mobileWEB ACTIVATION

**Ljubljana, 21.november 2018**

GEFCO Group is a world expert in supply chain solutions and the Europeans lead in automotive logistics.

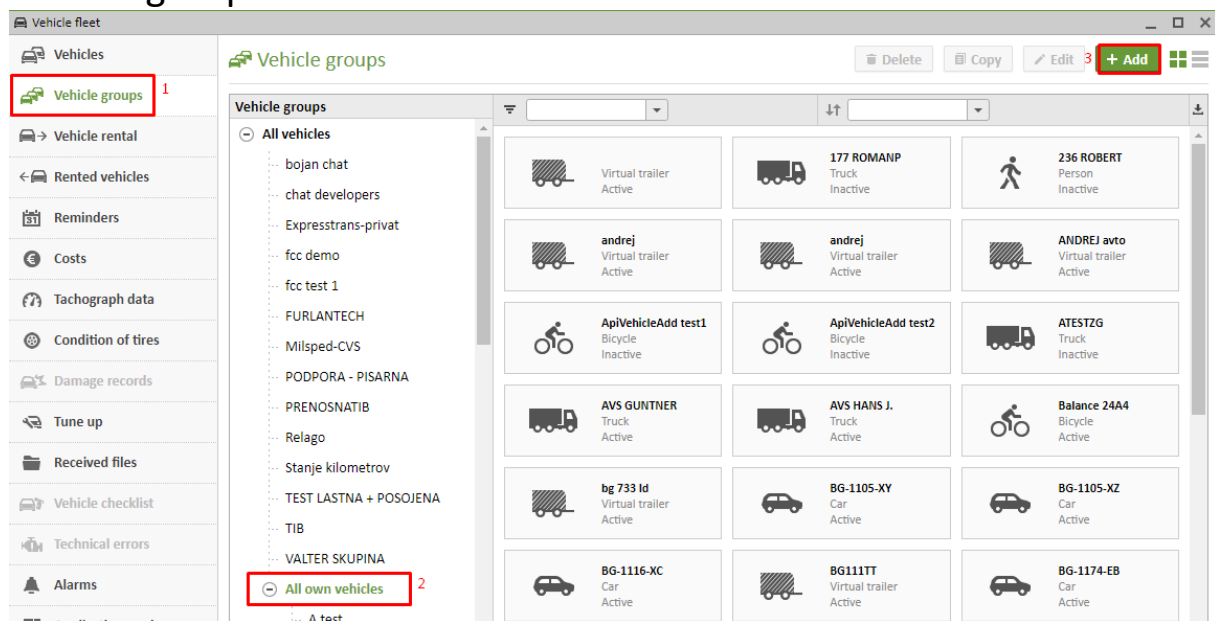

How to setup GEFCO services with mobileWEB application.

1. User (owner or Administrator) goes under Vehicle fleet Icon

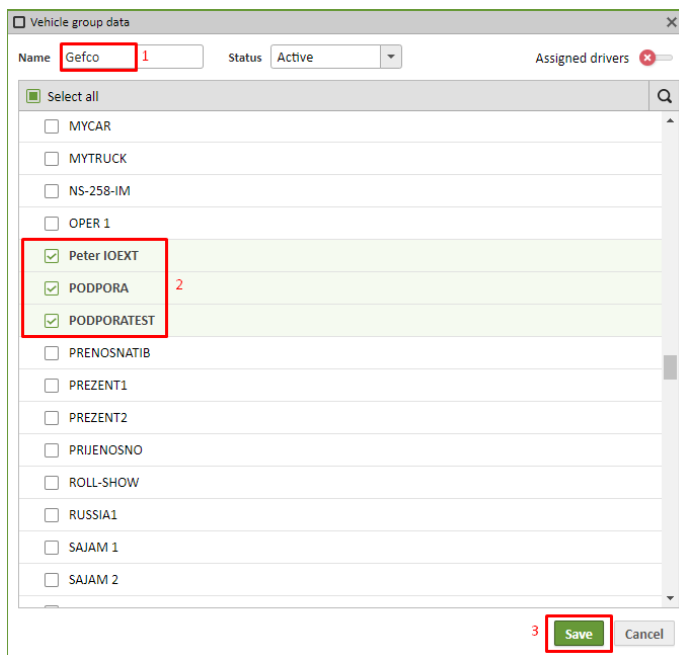

2. He has to setup group of vehicles first. **IMPORTANT!** *User must create group of vehicles under All own vehicles*

Vehicle groups -> All own vehicles -> +Add

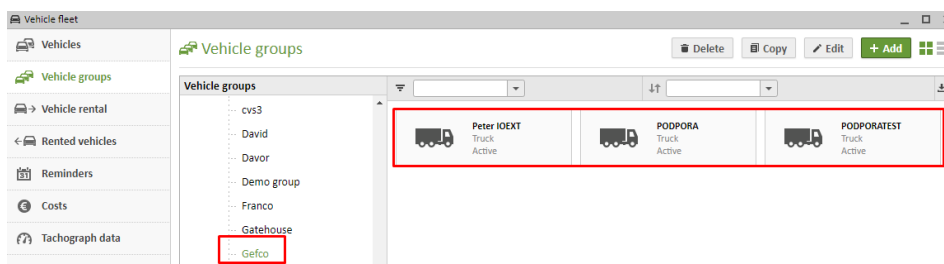

New window opens after pressing +Add ,

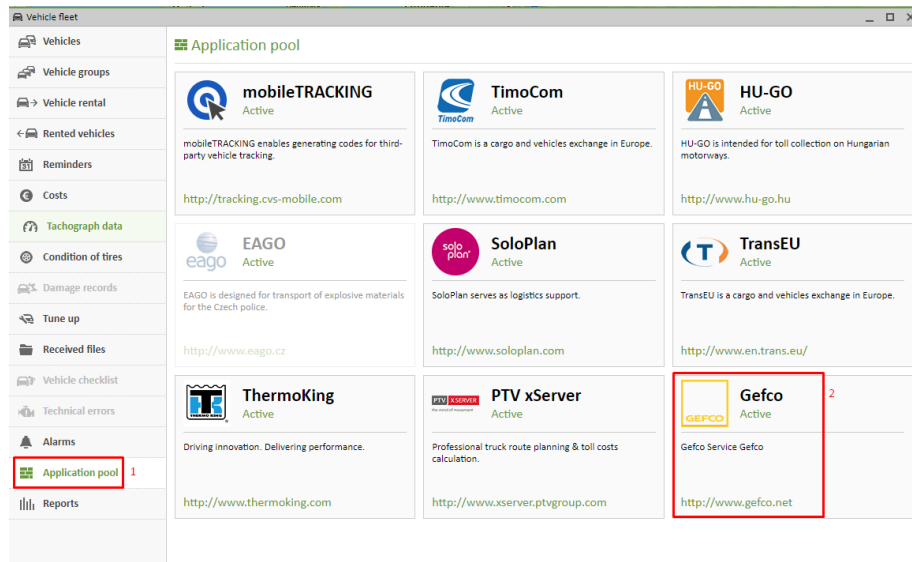

- we write name of the group(1) (in our case »Gefco«)
- select vehicles which we wish to have in this group(2)
- to save changes we press save(3)

Group Gefco is now created

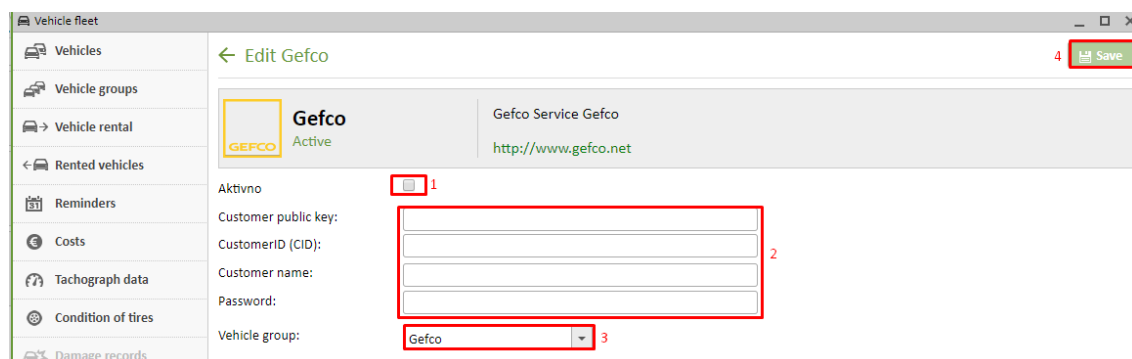

### 3. Activation of GEFECO services. Services are located under Vehicle fleet -> Application pool(1) -> Gefco(2)

Under Edit Gefco we need to fill up next options

- *Aktivno/Active(1)* enables/disables Gefco services
- *Customer public key – CustomerID(CID) – Customer name – Password (2)* – This data is provided from Gefco
- *Vehicle group(3)* we select group of vehicles if group is not selected all vehicles are seen to Gefco services
- *Save(4)* Save all the settings

Gefco services are now implemented into mobileWEB application and data are now sending to Gefco group.
